## Agricultural Pests / Moths

Pest	Scientific Name	Common Name	Recommended trap
	<i>Acrolepiopsis assectella</i>	Leek Moth	Delta Trap, Unitrap
	<i>Agrotis exclamationis</i>	Heart and Dart Moth	Delta Trap, Unitrap
	<i>Agrotis fucosa</i>	Common Cutworm	Delta Trap, Unitrap
	<i>Agrotis ipsilon</i>	Black Cutworm	Delta Trap, Unitrap
	<i>Agrotis segetum</i>	Turnip Moth	Delta Trap, Unitrap
	<i>Autographa californica</i>	Alfafa Looper	Delta Trap, Unitrap
	<i>Autographa gamma</i>	Silver Y	Delta Trap, Unitrap
	<i>Bembecia scopigera</i>	Six-belted Clearwing	Delta Trap, Unitrap
	<i>Busseola fusca</i>	Maize Stalk Borer	Delta Trap, Unitrap
	<i>Chilo infuscatellus</i>	Sugarcane Stem Borer	Delta Trap, Unitrap
	<i>Chilo partellus</i>	Spotted Stalk Borer	Delta Trap, Unitrap
	<i>Chilo suppressalis</i>	Asiatic Rice Borer	Delta Trap, Unitrap
	<i>Chrysodeixis chalcites</i>	Tomato Looper	Delta Trap

## Agricultural Pests

Pest	Scientific Name	Common Name	Recommended trap
	<i>Cnephasia longana</i>	Omnivorous Leaf Tier	Delta Trap
	<i>Cnephasia pumicana</i>	Cereal Tortrix	Delta Trap
	<i>Cryptoblabes gnidiella</i>	Christmas Berry Moth	Delta Trap
	<i>Cryptophlebia batrachopa</i>	Fruit Borer	Delta Trap
	<i>Cydia (Laspeyresia) medicaginis</i>	Alfafa Moth	Delta Trap
	<i>Cydia (Laspeyresia) nigricana</i>	Pea Moth	Delta Trap
	<i>Cydia pomonella</i>	Codling Moth	Delta Trap
	<i>Earias insulana</i>	Egyptian Boll Worm	Delta Trap, Unitrap
	<i>Earias vittella</i>	Rough (Spotted) Boll Worm	Delta Trap, Unitrap
	<i>Ectomyelois ceratoniae</i>	Carob Moth	Delta Trap
	<i>Etiella zinckenella</i>	Lima Bean Pod Borer	Delta Trap
	<i>Evergestis forficalis</i>	Garden Pebble	Delta Trap, Unitrap
	<i>Gortyna xanthenes</i>	Artichoke Moth	Delta Trap, Unitrap
	<i>Helicoverpa armigera</i>	Cotton Boll Worm	Unitrap

*Helicoverpa punctigera*

	<i>Vespula germanica &amp; Vespula vulgaris</i>	Wasps	Bag Trap, Liquibaitor Trap

# IQ Traps

## IQ Water Trap

We sell water traps in a shade of blue and black. Our traps have a wide base and contain a lure cage positioned in the middle with easy access. Water traps are a useful choice for a number of horticultural pests such as some of the micro moths (e.g. *Tuta absoluta*) and thrip species. We do not offer a light source on our traps. We believe that unless used in a completely contained area by-catch of a wide range of insects will occur. Most nocturnal parasitic wasps, an important natural control agent, are attracted to lights.

## IQ Delta Trap

We offer Delta traps in the colours yellow green and white. Depending on the pest, colour can be important so if you are unsure of this, we are always happy to advise. Our Delta traps come flat packed and are durable enough to give two seasons worth of use. A metal hanger is provided and an optional lure cage is available. Sticky boards for these traps are available in packs of 3 or 10.

### IQ Sticky Boards

We offer both dry and wet sticky boards in a range of colours. Wet sticky boards are available in sizes of 10x20 cm, 20x20 cm and 20x40 cm. Dry sticky boards are available in sizes of 10x25 cm and 20x40 cm. We also offer a yellow dry sticky board with monitoring grid in two sizes: 10x25 cm and 40x25 cm.

### IQ Liquibaitor Trap

Our durable Liquibaitor trap is based upon the design of the McPhail trap. This trap consists of two parts; a lid containing a lure cage and a lower bucket with funnel entrance. Liquid lures can be used in this trap and a wide range of colours are available.

### IQ Bag Trap

Our bag traps have a transparent bag and black top with a net funnel entrance. The net funnel reduces escape rates and the black colour provides contrast against surroundings, an important property for attracting Muscid flies to the trap. A dry or liquid bait can be used in these traps such as our MuscaTract powder, which is mixed with 200-250 ml water.

### IQ Unitrap

This is the original Unitrap, designed and manufactured by us at IPS. The funnel entrance is positioned at the top beneath a covering lid. These traps are a better option than the delta trap when trapping in dusty conditions and when thomoth pests are particularly large (e.g. *Cossus cossus*). They are also the best choice to use for specific pests, such as some *Synanthedon* species.

### IQ Stinkbug Trap

The Stink Bug Trap we sell is a very effective design for catching shield bugs, also known as stink bugs. Unlike the much larger ground based trap, also available for these pests, this trap is smaller and more mobile, and can be hung from a tree or similar support.

### IQ Vane Trap

We offer two different sizes of vane for our Vane traps. The larger vane is more suitable for larger beetles. These traps can be situated on the ground or hung in trees and are the most effective trap for garden and forestry beetle pests. These traps are available in a range of different colour combinations.

### IQ Bucket Trap

Our bucket trap is the most suitable trap choice for large beetle pests such as *Oryctes* and *Rhynchophorus* species. Four holes are present around the side and three in the lid. The bucket can be buried in the ground (our recommended method) or hung in a tree. A mesh is provided to enable beetles to cling to the side, if the bucket is hung from a tree. Black has been shown to be the most attractive colour in studies and the large size (compared to the Picusan trap, for example) allows a greater catch rate between monitoring visits.

### IQ Maxitrap

We regard the Maxi Trap as the best monitoring trap on the market for the Mediterranean fruit fly, *Ceratitis capitata*. It is also a very effective trap for a range of other fruit fly pests. Escape rates are low and side entrances coupled with a lower funnel entrance ensure a greater odour transfer is achieved.
